Detalhamento das falhas (2)

SRI ausente em scripts externos

ALTA

EVIDÊNCIA

11 de 11 scripts externos sem SRI (100%) — acima do limite de 50%. Domínios sem SRI: bigspotteddog.github.io, cdn.asksuite.com, code.jquery.com, ms-cdn.multiscreensite.com, omnibees-chatbot.s3.amazonaws.com, static.cdn-website.com, widgets.omnibees.com, www.googletagmanager.com.

IMPACTO

Se um CDN de terceiros for comprometido, um script alterado executa sem qualquer detecção.

CORREÇÃO

Adicione Subresource Integrity (SRI) e crossorigin a cada script externo.

```
<script src="https://cdn.exemplo.com/lib.js"
  integrity="sha384-..."
  crossorigin="anonymous"></script>
```

Scripts de fontes arriscadas

ALTA

EVIDÊNCIA

2 script(s) carregado(s) de fonte(s) arriscada(s): https://omnibees-chatbot.s3.amazonaws.com/public/CHAT_CLIENT_OMNIBEES/chat_web_651d662c7adb2d00012e596f.js → bucket S3 público (amazonaws.com); https://bigspotteddog.github.io/ScrollToFixed/jquery-scrolltofixed-min.js → GitHub Pages pessoal (*.github.io).

IMPACTO

Código servido de GitHub Pages pessoal, buckets S3 públicos ou paste sites pode ser alterado por terceiros a qualquer momento — vetor direto de supply chain.

CORREÇÃO

Hospede o script em infraestrutura própria ou CDN confiável e aplique SRI.

```
<!-- evite: https://usuario.github.io/... , https://bucket.s3.amazonaws.com/... -->
```
